PRESS RELEASE: FOR IMMEDIATE RELEASE

STARTS

SAVANT LIMITED ENJOYS CONTINUED SUCCESS AS INSWINDON B.I.D. COMPLETES IMPLEMENTATION OF THEIR MOBILERANGER SYSTEM.

Savant, a leading software development organisation is celebrating another sale of their innovative, PDA based, **MobileRanger** system, this time to **InSwindon Business Improvement District (BID)**.

MobileRanger will allow **InSwindon** to record Street Team activity and share statistics on these activities with partner organisations easily and efficiently. This will reduce the amount of paperwork being completed by the Street Team providing them with more time on the streets serving the public.

Bernie Maguire, Town Centre Manager for InSwindon said “MobileRanger will make our Street Team more effective and allow us to report quickly to our partners. It is much more efficient than our old paper based system.”

The Street Team will use the PDAs to document their daily activities from meeting and greeting the public to cleaning up the streets.

Glyn Jones, Business Development Manager at Savant Limited stated “We are happy to have sold MobileRanger to InSwindon adding to our continued growth in this market. We are confident they will benefit from this innovative system.”

ENDS

Editor's Notes

Savant Limited has been implementing innovative IT solutions for the last 25 years. Swindon is one of seven centres now running MobileRanger. See www.savant.co.uk/mobileranger for more.
