PRESS RELEASE: FOR IMMEDIATE RELEASE

STARTS

Savant Limited's Mobileranger Application Achieves "Motorola Enterprise Mobility Validation"

Motorola today announced that **MobileRanger** had achieved "Enterprise Mobility Validated" certification. The specific certification tests were conducted on the Motorola MC35 series of wireless mobile computers. This is a result of joint testing at the Motorola Solution Centre located in Reading, UK.

MobileRanger is a comprehensive mobile incident and activity management solution for Town Centres, Business Improvement Districts and any Warden/Ranger team. It offers a complete solution to those creating a safer, cleaner and greener community to live and work in.

Glyn Jones, Business Development Manager at Savant Limited stated "We are delighted to have MobileRanger validated by Motorola. It reflects the efforts we have made to ensure that MobileRanger is a reliable and future proof solution that brings immediate benefit to our customers."

Motorola's Solutions Validation Program enables partners to test and validate their mobility solutions on Motorola products to help ensure interoperability and meet the customer application-specific needs, and to reduce both the risk level and the time to deployment for the customer. The terms of the validation, including disclaimers, are set forth in the Test Agreement between Motorola and Savant, and in the validation report.
