Welcome to the first electronic Mobile Observer

We aim to keep you updated on our activities in the area of mobile computing including new product information, case studies and other relevant issues. Since we began our development work in this area in 2004, we've seen mobile computing dramatically grow with applications becoming an essential part of many businesses.

Our MobileRanger and Care on the Move products have created significant benefits in business sectors such as Town Centre Management and Healthcare.

Motorola Validation MobileRanger certified as a future proof solution

MobileRanger has been awarded 'Enterprise Mobility Validated' certification from Motorola phone giant Motorola. Extensive tests were carried out by Motorola on its MC35 series of wireless mobile computers. Motorola's validation program enables partners such as Savant, to test and validate mobility solutions on Motorola products to help ensure interoperability and meet customer application needs. This validation reassures customers that MobileRanger is a reliable and future proof solution that brings immediate benefits with minimal deployment. [Click here for more...](#)

Successful Care on the Move trial More accurate reporting and significant time savings

The University Hospitals of Coventry and Warwickshire (UHCW) have just completed a highly successful clinical adverse event (CAE) trial on our Care on the Move mobile application. Using PDAs instead of paper forms, staff were able to report any patient

Town Centres in Derby & Daventry now using MobileRanger Cleaner, safer and friendlier communities

We're delighted to welcome Derby and Daventry to our growing list of towns in the UK deciding to use MobileRanger as part of their Business Improvement District (BID) initiatives. BIDs are a partnership between local business and local public services to make towns safer, cleaner and friendlier for the community by integrating essential services from Police, Council and other organisations.

Participating towns fund the project by setting a modest levy on business rates. The public face is a team of rangers (numbers vary from project to project), who act as an interface between town centre businesses and deal with the enormous range of issues that arise.

Using a PDA and MobileRanger, the BID rangers can collect important data, ensure all data gathered is consistent and accurate, and produce timely reports to business on the effectiveness of the BID project. Towns up and down the UK participating in BID initiatives using MobileRanger, are thrilled with the results. For more information on

The finalists for the 2008 award were Birmingham City Centre and North Kirklees. After much deliberation, the prize was given to Birmingham's City Centre Warden Scheme. While we congratulate Birmingham, all of us at Savant believe community wardens everywhere deserve thanks and recognition for their valiant work. [Click here for more information on Wardens 08.](#)

Try MobileRanger today...

Easy to download demo
If you'd like to try all of our MobileRanger's features and see how it could benefit your organisation, you can now download a demonstration version to run on a Windows PDA. [Click here for details.](#)

Tell us what you think

If you have any comments on MobileRanger or Care on the Move, you can vote on features and leave suggestions on our web feedback page. Your feedback is important to help us plan and develop new features for future versions of these products. [Click here to leave feedback.](#)

adverse events, analyse data in a consistent way and provide clinicians with early feedback, which will lead to a reduction of incident impact. This will help improve overall patient care.

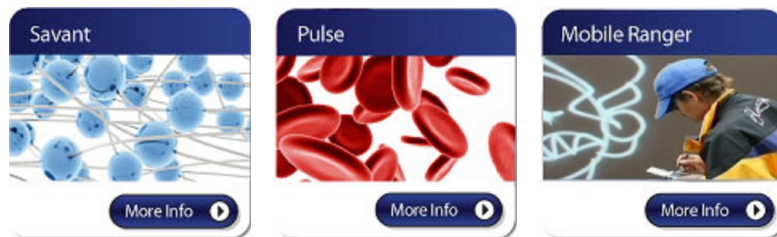

The paper based system is vulnerable to the risk of inaccurate or inconsistent reporting and liable to delays resulting from paper handling in a busy hospital. The UHCW Governance team are delighted with the results of this first trial and have already commissioned an imminent second trial. For more information on Care on the Move [click here](#).

Warden Team Awards

Recognition for unsung heroes

In October of 2008 we were proud to sponsor the 2008 Warden of the Year award. These awards aim to provide recognition of the hard work and dedication of community Wardens who can often be faced with challenging issues. Community Wardens improve efficiency, support neighbourhood management and act as an important conduit for essential services, particularly in disadvantaged areas of the country.
