Proper Planning & Prevention

Incident Management

Being able to respond quickly to business disruptions is important, but being able to manage the incident plan from wherever you are is critical.

Plan Activation

With Mobile Mataco you and your nominated plan managers have access to your plans, or their relevant sections, from any mobile device and can view and activate them by contacting relevant contacts via SMS, email or phone.

Operational Support

You can keep your entire organisation updated on the latest status of any incident using the Mataco dashboard.

Plan Quality

Effective incident management will only be possible when good quality plans have been created and then they are exercised regularly. Mataco was developed with the BCI's Good Practice Guidelines and the ISO 22301 standard in mind.

BCM – Management Professional Practices

Policy and Programme Management
Embedding BCM into the organization's culture

BCM – Technical Professional Practices

Understanding the organisation
Determining Business Continuity Strategy
Developing and implementing a BCM response
Exercising, maintaining, auditing & self-assessment of the BCM culture

Savant: the business behind Mataco™

Savant Limited supplies software and database development and consultancy expertise for life and business critical systems.

Savant has been established for over 30 years and has experience building, implementing and supporting technologies for infrastructures from national data centres to tablets and smart phones.

We work with our clients to deliver solutions that align to their strategic IT and business visions and implement packaged or bespoke solutions as required.

We used this experience, working in conjunction with our consultant partners, to develop the Mataco™ business continuity planning tool.
