

Savant LabelCyte Application

LabelCyte is available for use within any Human Tissue and Organ organisation and follows the new regulatory requirements for Human Tissue product labelling. This extremely useful application allows tissue facilities to wand information from non-compliant labels and produce fully compliant labels effortlessly.

LabelCyte - Simplifying Regulatory Change

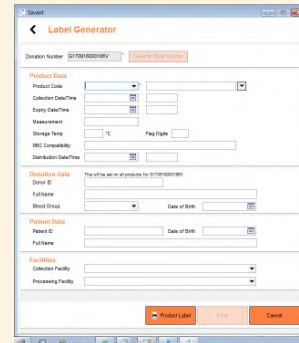

LabelCyte allows users to create SEC (Single European Compliant) labels and automatic creation of unique ICCBBA and ISBT128 compliant donation numbers. Along with the inbuilt ability to interface with both Zebra and Brady label printers, this application generates barcodes in either Linear, 2D (data matrix) or QR Barcode formats.

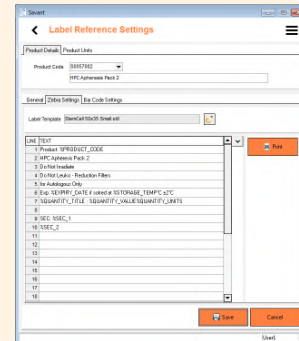

All actions are recorded in order to provide users with a full audit trail.

Features & Benefits

- Create unique ICCBBA and ISBT128 compatible donation numbers
- FACT-JACIE and ISBT128 compliant labelling
- Zebra or Brady labelling

- SEC compliant (Single European Code)
- Linear, 2D (data matrix) and QR barcode labelling
- Print multiple labels with donation number details

- Print Collection, Final and Bio- hazard product labels
- Split pack labelling
- Secure logins
- Includes database access with no limits to storage
- Automatic data backups

Software Solutions

You can trust

Savant Ltd

Established over 35 years ago, Savant are proud to be an employee-owned company who strive to comply with our business and ethical responsibilities. With a wealth of experience in implementing technologies for a wide range of infrastructures from national data centres to smart phones, we will work with clients to deliver solutions that align with their company's strategic and business plans. Whether implementing package or developing bespoke solutions, we will support our clients at all stages of the process from the initial requirements and development through to testing, training and ongoing UK based support.

Accreditations & Partnerships

Savant are accredited with ISO 9001:2015 and ISO 27001:2013, this rigour combined with our user-centric approach helps us in understanding our customers' software and hardware needs. ISO 9001 demonstrates our commitment to providing the highest quality services to our customers, whilst ISO 27001 provides assurance about the quality and security of the way we work, as well as the steps we take to protect valuable business information.

Examples from our project portfolio

Li-LAC MB & Li-LAC MMC — Our human milk bank system will manage all aspects of human breast milk from donation, labelling, testing, production, tracking through to distribution.

Mataco— Savant's cloud-based Business Continuity software system to create and manage a comprehensive BCM plan - available for tablet, smart phone and desktop PC

SSC— The Savant Stock Control system (SSC) is a secure, cloud-based stock management service for clinical laboratories - covering: deliveries, stock issue, stock movements, quarantine, discards, stock reconciliation and stock reporting & ordering.
